Slenco Trap Tap

- Mount this fitting to nearly any plastic or metal floor drain cover.
- Fitting accepts either a 5/8" or 3/4" I.D. hose.
- Rubber washer seals fitting to drain cover.
- The Trap Tap contains the water and forces it to drain through the cover without spreading over the surface.
- Installation kit includes: Fitting, Mounting Screw, Rubber Washer
- Use on all types of drain lines including:
Air conditioner drain lines
Humidifier drain lines
High efficiency furnace drain lines,
Dehumidifier drain lines

GREASETRAPS- Schier Grease Traps
Page H-6 - RW List Prices

Schier Trapper II Grease Traps

The Trapper II's inlet and outlet diffusers create a unique flow pattern, allowing grease to collect at the surface, sediment to drop, and gray water to pass through. A built in flow control is located inside the inlet diff user and is easily cleanable. It does not require an external flow control fitting.

- Built in flow control
Above or below grade
Heavy duty polyethylene
Stainless steel cover bolts
Unique flow pattern
Cover gasket won't rot or flatten
Built in triple outlet
3/4" polyethylene covers rated up to 500 lb.
Low annual maintenance cost

Since 1972 Schier Products has been pioneering drain line purity for the plumbing and wastewater industries. Our mission is to help keep America's sewer lines flowing free of unwanted chemical, liquid and solid waste. We realize this mission by listening to our customers, installers, designers and municipal inspectors – then providing them with quality pretreatment product solutions.

Grease Interceptors: Schier introduced its first line of corrosion-proof, polyethylene grease interceptors in the early 90's to serve commercial kitchens big and small. The market was fed up with the status quo of rust-prone, ineffective fabricated steel interceptors. Now offering the industry's only lifetime warranty along with an unmatched, proven grease storage capacity, Schier's grease interceptors have become the benchmark for durable materials, craftsmanship and innovative design.

Schier Products is a family owned company. We are proud to design and manufacture our products in New Berlin, Wisconsin, USA. We are driven by dedicated employees who thrive on the challenge of providing our customers with the best answers, the best products and the best service at a fair price...

Table with 3 columns: Part #, Description, Price. Lists various grease trap models and their prices.

SPECIFICATIONS

Large table with columns: SCHIER MODEL, G.P.M., CAPACITY (Grease in LBS., Liquid in GAL.), OUTSIDE DIMENSIONS (L, W, H), PIPE SIZE (NO-HUB) (Standard, Option), PIPING DIMENSIONS (A, B, C, D, E), Weight in LBS.

Maintenance clearance height: Allow 8" from top of tank to remove cover and internal parts.

For 59 years, Mission Rubber Company has supplied quality, code approved products to the construction industry for the purpose of connecting, adapting, reducing, repairing or capping almost any type of pipe used in sewer and drain waste and vent applications.

Our company is a part of MCP Industries, Inc. which includes four vitrified clay sewer pipe factories, a silicone hose company, a urethane company and a plastic company. Mission Rubber Company was founded in 1951 by a plumbing contractor and is currently managed by family members. Our products are sold in the United States and Canada through manufacturer's representatives, and internationally through distributors.

PIPESUPPORT- Pipe Supports
Page H-20 - RW List Prices

Miro 1.5 Pillow Block Pipe Supports

- A pipe support used to support roof-mounted gas pipes, electrical conduit, solar piping and other mechanical piping.
Unique design absorbs thermal expansion and contraction of pipes thus preventing damage to the roof membrane.
Pipes rest in a 'U' shaped cradle situated in a polycarbonate resin seat.
Each pipe stand will accommodate up to 1.5" inside diameter pipes.
The maximum outside diameter of pipe which can be cradled in the Model 1.5 support is 1.9".
Polycarbonate Resin

Table with 3 columns: Part #, Description, Price. Rows include Model 1.5 Miro Poly Pipe Support (16.90) and Miro Spacer For 1.5 Support (13.18).

MIRO Industries, Inc. specializes in pre-manufactured pipe, conduit, duct, and mechanical supports for roof top applications. We have been providing the roofing and mechanical industry with non-penetrating pipe supports since 1982.

For the past 20 years we have been widely accepted throughout the industry as a preferred system to wood blocks or penetrating the roof membrane in order to support rooftop pipe and other mechanical units.

We are currently found under Divisions 15 of Mechanical, 7 of Roofing, and 16 of Electrical. Miro is recognized as the foremost authority in non-penetrating pipe support systems.

MIRO Industries, Inc. and its founders and officers have accumulated years of experience in the roofing industry, including industrial and commercial roof inspection, analysis, and renovation design engineering.

Day in and day out, the system of pipes and conduit on the roof of your building is in motion, expanding and contracting with the fluctuation in temperatures.

Gashes and cuts in the roof membrane cause leaks, damage, and ultimately the need for costly repairs. The wooden block method of installation could destroy a roof that is designed and warranted to last for many years.

MIRO Industries, Inc. produces various models of pipe and conduit Pillow Block Pipestands. The base of each pipestand is gently curved to prevent gouging and ripping the roof membrane.

MIRO MODEL NAMES: Miro products are named for the largest pipe, measuring inside diameter, that will fit upon the pipe stand.

Miro 3-R Pillow Block Pipe Supports

- A "roller-bearing" pipe support used to support roof-mounted gas pipes, electrical conduit, solar piping and other mechanical piping.
Unique design absorbs thermal expansion and contraction of pipes thus preventing damage to the roof membrane.
Each pipestand will accommodate up to 3-3/4" outside diameter pipes.
Polycarbonate Resin

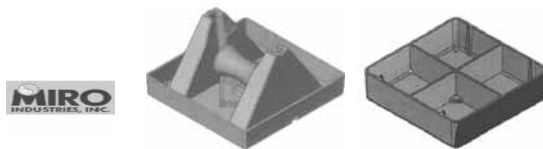

Table with 3 columns: Part #, Description, Price. Rows include Model 3-R Miro Poly Pipe Support (34.30) and Miro Spacer For 3-R Support (20.50).

Sioux Chief Company History

Sioux Chief Mfg. Co. Inc. was founded and incorporated in August, 1957 by the late Martin E. "Ed" Ismert, Jr. in an attempt to smooth the "boom bust" housing cycle that his plumbing wholesale supply company experienced. Sioux Chief got its start during the late 50's by packaging specialty fasteners and other items geared toward residential plumbing jobs. In the early 60's, Ed borrowed the idea of spinning copper tube closed for simple air chambers and adapted it for stub outs which could be used by plumbers. This preformed copper tube saved plumbers from sweat soldering tube caps onto their copper tube for water shock and test-off purposes.

By 1975 a heavy emphasis on sales and new product development began when Ed's two eldest sons purchased the corporation and took over operations. Since then Sioux Chief has introduced innovative products such as the Stub Out Ell, Sioux Strap, Tube Talon, Branchmaster, Touchdown, Hydra-Rester, Grid Iron, Hangs Tuff, Zipstick, and Test Titan. Sioux Chief began its operations in a 3,000 square foot third floor area of Double I Supply, a plumbing wholesaler in the Kansas City, Kansas west river bottoms, from 1957 to 1967. After moving to Kansas City, Missouri from 1967 to 1969, Sioux Chief grew into a 10,000 square foot building in Grandview, Missouri from 1970 until 1983. In 1983, the corporation purchased its own building for the first time, a 23,000 square foot plant, warehouse and office south of Peculiar, Missouri. Today this plant-warehouse-office has grown to occupy more than 145,000 square feet on 120 acres.

The Mission Of Sioux Chief

Sioux Chief Manufacturing's primary purpose is to provide better value to our customer by offering innovative products of quality and superior customer service to the professional plumbing and mechanical contractor through qualified traditional plumbing distributors. We do this by going about our daily duty safely, conscious of our best quality, and in our most productive manner. At Sioux Chief, our customer is our chief. The managers here do not pay the wages . . . they only route the revenue for growth. It is our customer who pays our wages with their continued good will and loyalty. We will never assume that loyalty. We strive every day to improve quality and service for our customer, and we put all of our hearts, minds, and bodies into this improvement.

Quality Products Made in the U.S.A.

Sioux Chief prides itself in offering our American made products to the world. Uncompromised quality and value are built in to every product we offer. Sioux Chief delivers orders complete and on time with the most outstanding customer service possible.

While working on a plumbing project in 1951, Lloyd Cherne mistakenly installed an access tee that had a smaller diameter opening than the correct cleanout tee and therefore could not get his cast iron plug to fit. Lloyd thought there had to be a better solution than ripping out three stories of cast iron pipe in order to replace the tee with the correct size. He proceeded to affix an ordinary valve stem to a rubber playground ball and the Test-Ball® idea was conceived. Cherne Industries was founded shortly thereafter in 1953.

Cherne is recognized as an industry leader throughout the world, selling pipe plugs and testing equipment from Minneapolis to Madrid. In 1998, Cherne demonstrated a commitment to quality and continuous improvement of the management system by achieving the ISO 9001 registration. Cherne is the only domestic pipe plug manufacturer to achieve this certification. Serving the plumbing and underground industries for almost 50 years, Cherne is dedicated in providing customers with unparalleled product quality in addition to the highest level of customer service.
